```
Question 1
Correct
Mark 1.00 out of 1.00
```

Problem Statement

Given an array of 1s and 0s this has all 1s first followed by all 0s. Aim is to find the number of 0s. Write a program using Divide and Conquer to Count the number of zeroes in the given array.

Input Format

First Line Contains Integer m – Size of array

Next m lines Contains m numbers - Elements of an array

Output Format

First Line Contains Integer - Number of zeroes present in the given array.

Answer: (penalty regime: 0 %)

```
#include <stdio.h>
 2 v int findFirstZero(int arr[], int low, int high) {
 3 ₹
        if (high >= low) {
 4
             int mid = (low + high) / 2;
             if (arr[mid] == 0 && (mid == 0 || arr[mid - 1] == 1))
 5
 6
                 return mid;
 7
             if (arr[mid] == 1)
 8
                 return findFirstZero(arr, mid + 1, high);
 9
             return findFirstZero(arr, low, mid - 1);
10
        return -1;
11
12
13 v int countZeroes(int arr[], int size) {
        int firstZeroIndex = findFirstZero(arr, 0, size - 1);
14
15
        if (firstZeroIndex == -1)
16
            return 0;
17
        return size - firstZeroIndex;
18
    }
19
20
    int main() {
21
        int m;
        scanf("%d", &m);
22
23
        int arr[m];
24
        for (int i = 0; i < m; i++) {</pre>
             scanf("%d", &arr[i]);
25
26
        int result = countZeroes(arr, m);
printf("%d",result);
27
28
29
        return 0;

2-Majority Element ►

<u>Dashboard</u> / <u>My courses</u> / <u>CS23331-DAA-2023-AIDS</u> / <u>Divide and Conquer</u> / <u>2-Majority Element</u>

Started on	Tuesday, 1 October 2024, 1:48 PM
State	Finished
Completed on	Tuesday, 1 October 2024, 1:53 PM
Time taken	4 mins 15 secs
Marks	1.00/1.00
Grade	10.00 out of 10.00 (100 %)

```
Question 1
Correct
Mark 1.00 out of 1.00
```

Given an array nums of size n, return the majority element.

The majority element is the element that appears more than [n / 2] times. You may assume that the majority element always exists in the array.

Example 1:

```
Input: nums = [3,2,3]
Output: 3
```

Example 2:

```
Input: nums = [2,2,1,1,1,2,2]
Output: 2
```

Constraints:

```
    n == nums.length
    1 <= n <= 5 * 10<sup>4</sup>
    -2<sup>31</sup> <= nums[i] <= 2<sup>31</sup> - 1
```

For example:

Input	Result
3 3 2 3	3
7 2 2 1 1 1 2 2	2

Answer: (penalty regime: 0 %)

```
#include <stdio.h>
 2 v int majorityElement(int nums[], int size) {
        int candidate = 0, count = 0;
 3
 4 ▼
        for (int i = 0; i < size; i++) {</pre>
             if (count == 0) {
 5 🔻
 6
                 candidate = nums[i];
 7
             if (nums[i] == candidate) {
 8
9
                 count += 1;
10
11 🔻
             else {
12
                 count -= 1;
13
             }
14
15
        return candidate;
16
17
18
19 int main() {
        int n;
scanf("%d", &n);
20
21
22
        int nums[n];
23
        for (int i = 0; i < n; i++) {</pre>
             scanf("%d", &nums[i]);
24
25
        int majority = majorityElement(nums, n);
26
        printf("%d\n", majority);
27
28
        return 0;
29
    }

Time taken	22 mins 56 secs
Marks	1.00/1.00
Grade	10.00 out of 10.00 (100 %)

```
Question 1
Correct
Mark 1.00 out of 1.00
```

Problem Statement:

Given a sorted array of integers say arr[] and a number x. Write a recursive program using divide and conquer strategy to check if there exist two elements in the array whose sum = x. If there exist such two elements then return the numbers, otherwise print as "No".

Note: Write a Divide and Conquer Solution

Input Format

First Line Contains Integer n – Size of array

Next n lines Contains n numbers – Elements of an array

Last Line Contains Integer x – Sum Value

Output Format

First Line Contains Integer – Element1

Second Line Contains Integer – Element2 (Element 1 and Elements 2 together sums to value "x")

Answer: (penalty regime: 0 %)

```
#include <stdio.h>
 2 void findPair(int arr[], int low, int high, int x) {
 3 ₹
        if (low >= high) {
 4
             printf("No\n");
 5
             return;
 6
        }
 7
        int sum = arr[low] + arr[high];
        if (sum == x) {
    printf("%d\n", arr[low]);
 8
 9
             printf("%d\n", arr[high]);
10
11
             return;
12
        if (sum < x) {
